

# Trentasei.09

Elegant and exclusive for smart retail engagement.

- ✓ Indoor totem
- ✓ Dust proof
- ✓ Retail and fashion
- ✓ Maintenance free

## DESIGN

Imecon "Trentasei.09" indoor line-up of products has been designed for installation in elegant and smart retail environments (shopping malls, luxury shops), with a reduced TCO approach by means of the Imecon proprietary technologies implemented in the devices. "Trentasei.09" is dust-proof and totally fanless in order to avoid any periodical maintenance and prevent possible mechanical failures.

Front opening allow a flexible installation in any location: attached to a wall, back-to-back with another totem for a double-sided version, or self-standing in a venue.

## PERFORMANCE

The range of products includes several sizes (46" up to 80") and is available in many configurations; the extremely narrow thickness (69mm) and the elegant aluminium casing allow an easy customization of the external shape to offer a unique look and feel in relationship with the installation site or with the customer branding style.

The backlighting system can be selected in a range from 450cd/m<sup>2</sup> up to 700cd/m<sup>2</sup> perfect visibility in every shop; self-adjustment for ambient light levels (measured via a light sensor fitted on the glass door) and environmental conditions (temperature) optimize the power consumption and the product lifetime.

Display sizes	40", 46", 55", 65", 70", 75", 80"
Protection Index	IP60
Cooling	fanless dust-proof
Environment	indoor
Brightness	450 - 700 cd/m <sup>2</sup>
Operation	20/7
Integrated PC	Core i5
